DETAILED ACTION

1. Response and amendment filed by applicants in paper No. 6, dated Oct. 27, 2003 have been entered and considered carefully. Claims 13 has been canceled. Claims 1-12, 14-26 are pending.
2. The rejection of claims 12, 14-19 under 35 USC 112 second paragraph because of lacking therapeutically effective amount is dropped in view of the insertion of *effective amount* in the pharmaceutically composition.
3. The rejection of claims 20-26 under 35 USC 112 second paragraph is maintained over the now amended claims 20-26 for the following reason:

Claims 20-26 employed the term "modulating intestinal motility" which encompassed both enhancement of motility or inhibiting motility. Please note that a compound of the claims which has $\beta 3$ -agonistic activity can not be both enhancing and inhibiting simultaneously. It is recommended that the particularity be pointed out in accordance with proper descriptive support.
4. The rejection of claims 1, 10-11, 12-20 under 35 USC 102(a)(e) or (g) over Sum et al. '685 is maintained for reason of record.

Applicants argued that a certified copy of the priority document has been submitted thus obviated the rejection since priority date must be granted.

Initially, applicants are noted that such copy although was submitted by applicants was not found in the file. Further, the certified copy does not warrant granting of priority benefit since no translation was filed. The granting of priority benefit can only be warranted when an evaluation of the certified translation to confirm that the priority application disclosed the "same" invention as now disclosed in the pending application.

In addition, even if the priority benefit is granted, it can not obviate 102(a), (e) or (f) rejections. Please note that the instant "claims" are drawn the Sum et al. '685 compounds when R₂ is SO₂NR₃R₄. A survey of the specification revealed that descriptive and enabling support of how to make such compounds are not found. Please note that the specification disclosed process

on pages 4-9 for making the claimed compounds from an epoxide and a aminopiperidine. No disclosed on how a diamino compounds i.e.

can be employed to make the R2 is SO₂NR₃R₄ compounds (see col. 10-14, Sum '685). Since species anticipates the genus, the Sum '685 patent constitutes 102 (a), (e), or (f) for the scope of R2 is SO₂NR₃R₄.

5. The rejection of claims 1-5, 8, 10-11, 14-17, 20-24 under 35 USC 103(a) over Sum et al. '685 in view of Steffan et al. '901 is maintained for reason of record.

The same reasoning that the lacking of support for the R2 is SO₂NR₃R₄ compounds as delineated supra in section 4 is also applicable here and incorporated by reference.

6. The objection of claim 9 is maintained for reason of record. Claims 6-7 which are made independent are allowable.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
